*Are you still suffering from
occasional, severe
headaches or painful joints?*

*Are you still suffering
in spite of medication and diet
and life style changes?*

Then very likely you would benefit from the ultra concentrated novel ingredients in these formulas:*

- ✓ For the first time a Boswellia extract is available that is standardized to 90% of its active components instead of 3% as commercially available up to now. Boswellia inhibits the inflammation causing enzyme, 5-lipoxygenase, which is ignored by conventional preparations.
- ✓ The new Korean Angelica with high levels of decursinol fights pain over receptors in the nervous system.
- ✓ Willow Bark is well known for its pain relieving properties and is introduced here with a 50% concentration of salicin, instead of the commonly seen 1–2%.
(**Caution:** do not take Pain Relief™ if you should not be taking salicylates.)
- ✓ Clinical studies back up the effects of these amazing herbal ingredients.

**Ask your health care provider
about all our superior formulas*
for all your health needs.**
